June 1996

We are pleased to present the results of the 1995 Michigan Vegetable Survey. This bulletin represents a cooperative effort between the private and public sectors to provide current vegetable data.

Triennial fruit, vegetable and nursery/Christmas tree surveys began in 1991. This is the fifth report to be published under the Michigan Rotational Survey. The survey is funded by the legislature, administered by the Michigan Department of Agriculture, and conducted by the Federal/State Michigan Agricultural Statistics Service.

We sincerely appreciate the cooperation and assistance of all growers who voluntarily provided the data that made this report possible. We also extend thanks to vegetable processors and other industry officials, Michigan State University Extension Service, and data collectors of the National Association of the State Departments of Agriculture.

We look forward to our continued successful relationship which brings us together for the benefit of Michigan's agricultural industry. If you have any questions regarding this survey, or suggestions for improvement, please contact the Michigan Agricultural Statistics Service at (517) 334-6001.

Sincerely,

A handwritten signature in black ink, appearing to read "David D. Kleweno".

David D. Kleweno
State Statistician

Survey methods and questionnaire	30

The state is divided into nine agricultural statistics districts to make data comparison easier. An agricultural statistics district is a contiguous group of counties having relatively similar agricultural characteristics. Each district has within itself more homogeneous agriculture than the state as a whole. They are numbered from north to south and west to east.

Agricultural Statistics Districts
